

Protection and Beauty for Wood Outdoors

Wood is one of the most popular building materials but wood outdoors needs effective protection. If you want wood to remain beautiful for a long time, a wood preservative is needed that penetrates deeply into the wood but still allow it to breathe.

The valuable raw materials and pigments in Aidol HK Stain reliably protect wood for many years. Its long-term effect against fungi, blue stain and insects is documented according to the RAL Quality and Testing Provisions and the product is continuously monitored by the German Institute for Quality Assurance and Labelling e.V. Aidol HK Stain is perfect for soft and hardwood and also ideal for renovation coats.

Colours

*Colours not for use on directly weathered building elements (UV-protection) (The colours here may deviate slightly from the actual product)

Silver grey	White*	Hemlock*
Rustic oak	Light oak	Nut wood
Ebony	Teak	Fir green
Pine	Palisander	Stone pine/larch
Mahogany	Chestnut	Frisian blue
Salt green		
Clear*		

The substrate must be clean and dry. Renovation coats can be applied without sanding or stripping.

Our Tip:

Set up a trial area first to check the colour effect on the specific substrate. That way you'll be able to achieve the perfect coating!

*Special colours available on request.

Protection for wood outdoors

- ⊘ Blue stain
- ⊘ Rot
- ⊘ Insects
- ⊘ Mould & algae
- ⊘ UV-rays
- ⊘ Moisture

Properties

The decorative, solvent-based, wood preservative stain with an ultra-modern combination of effective ingredients for use outdoors.

- Does not flake, penetrates deeply
- Water repelling, fully breathable and moisture regulating
- Renovation coats can be applied without sanding or stripping

Tips & Important Information:

You don't need to use an additional wood preservative primer when you use Aidol HK Stain. Aidol HK Stain is a "2 in 1" product and already contains the most comprehensive wood protection you can get.

To achieve top silk gloss surfaces, we recommend applying an additional coat of Aidol Long Time Stain. Effective safety with RAL certification. Use wood preservatives responsibly and safely. Always read the label and product information before using.

Range of use

Aidol HK Stain is used to treat non load bearing wood in outdoor areas without ground contact.

Exterior:

- Facades
- Roof eaves
- Shutters & balcony railings
- High quality fences
- Palisades & pergolas
- Arbours & carports
- Wood decks, bridges & foot bridges
- Screen walls

Container sizes:

- 0.75 l
- 2.5 l
- 5 l

Application rate:

- 2.5 l are sufficient for coating approx. 12.5 m² twice
- According to RAL Quality and Testing Provisions: 200–250 ml/m²
